Sir,

No 314 — Dy 20th Sept 1899

Mnz. + 17-97

Adverting to your Rubkari No. 252 of 12th Sept. 1899 and in continuation of Govt Ro: No 297-8 Mnz+17-97 Dy 16th idem regarding the repairs of the Sri Chamundeswari temple, I am to state that the proposal to use burnt-stones for the floor of the Prakaram of the temple does not commend itself to Govt and that it will be quite sufficient if the floor be concreted to a width of 4 feet in the middle An Estimate amounting to Rs 90 for the work has accordingly been

Sanctd & forwarded
by you. I am now to
request that you will
be so good as to have
the work executed
before the Commencement
of the ensuing car
festival a

2. With refce to
the proposal (contained
in para 4 of the Rubkari
under repd) to cover up
the small open space
between the Mahadwara
and the Navaranga
mantap with Stone
Slabs at an cost of
Rs 675: I am to observe
that the only object
of covering up this portion

being sufficient to protect
the Verandah of the
Navaranga mantah
from the rains during
the Wet-weather, a
simple terrace with
ordinary wood work
would well answer
the purpose, without
~~involving such~~ incurring so heavy
Cost as Stone work,
and that further the
Cost of the terrace may
be minimized by using
for the wood work the
old timbers and Rafters
secured in the stores
by the removal
of the Vaimaligé dam
accordingly I request
that you will be so
good as to have an
Estimate the

Drawings prepared
at an early date
and submit it for
sanction of Govt.

Thanks
